I would like to thank Sandy Zabell for introducing me to mathematical logic and his helpful suggestions. I would like to thank Ken Mount for suggesting that I read Wilfrid Rall, which indirectly led to the early ideas that these kinds of results might be possible. I would like to thank Yuri Manin for his talk on computability which emphasized the importance of these concepts in mathematics.

I would like to thank Lutz Mueller for newLISP. This work would not have been possible without my using newLISP, particularly in regard to section 11.
